

We are actually looking for a

Senior Consultant Supply Chain Management
with a focus on Forecasting/Inventory
Management/S&OP/MPS/MRP

Optimact: Who we are?

Optimact is helping organizations to achieve sustainable benefits in their Supply Chain through specialized consulting services for the industry and the Health Care sector. We focus on helping organizations optimize their Supply Chain and align it to their business strategy. Making the right choices enables our clients to achieve their business objectives and improve significantly their operations.

We strongly believe that excellent solutions will be reached if they are based on solid Supply Chain concepts, if they create value for the company and if they are accepted and used throughout the whole organization.

We offer following services: Supply Chain Strategy, Supply Chain Planning, Supply Chain Operations and Supply Chain Intelligence. We work closely with our clients on all the Supply Chain issues: from improvement assessment through solution design to implementation. Process, organization, information systems and infrastructure are all tackled in our methodology.

Our approach is recognizable by our focus on getting measurable results, transferring our knowledge to our clients and coaching them to achieve future success. Working alongside our clients we create practical action plans that enable them to make their vision a reality.

Our strength lies in the abilities of our people: their breadth of experience, industry knowledge and progressive attitude.

We have Passion for Supply Chain Excellence.

Function: What we are looking for?

You will **lead Supply Chain improvement projects** at the customer site from the analysis of the current situation through the design of the solution up to its implementation.

Responsibilities include the overall planning, organizing, directing, controlling and delivery of the projects prioritized in alignment with the client's expectations and business needs.

You will understand the customer's needs and requirements and will be able to structure and translate them into Business Solutions. During the project you will also gradually build a preferred relationship of trust with several contacts within the customer organization through your competence and empathy for their situation. You are able to effectively coach people, to manage and inspire a team and to manage resistance to change in order to reach the project targets.

Part of these projects is also giving support on information technology. In the area of information technology we have developed Optimact which is a Supply Chain Planning tool. Therefore part of the job will be supporting the implementation of Optimact as project manager and consultant.

There is a large variety of projects, customers, industries and markets offering a thoroughly diversified scope.

Your Profile: What we expect

- You are passionate for Supply Chain Excellence.
- You have at least 5 years relevant experience in the industry and/or in consulting in the Supply Chain Management area including business process management skills
- You have an expertise in Forecasting, Inventory Management, Sales & Operations planning, MPS, MRP ...
- You have expertise in one of our main service domains: Supply Chain Strategy, Supply Chain Planning, Supply Chain Operations and Supply Chain Intelligence
- You have at least a bachelor degree. Having a CPIM or CSCP-degree is a plus.
- You have good analytical and problem solving skills, you can rely on organizational and people management skills and have project management experience
- You have a good understanding of supporting information technology (ERP, SCM Optimization Software)
- You are no-nonsense, open and direct in communication and willing to travel
- You are fluent in Dutch and English, and have a very good working knowledge of French

Our Offer: What you can expect

We offer a challenging environment with a lot of room for personal input to shape the business and the job, and grow personally in your profession.

We offer exciting projects in the field of Supply Chain Management in various industries and sectors.

We offer a competitive compensation according to your experience. Different possibilities in relation with contract types.
